WELCOME TO CRYSTAL HEALTH

Managing Electronic Health Records (EHR) is a *huge* problem in the United States.

Each hospital has their own unique version of patient health records.

This creates inefficiency and vulnerability in the healthcare system.

We believe we can solve this problem by creating health infrastructure for the 21st century.

ABOUT US

Our team at Crystal Health is building a mobile app that stores all of a patient's health records in one location.

Think of us like a dashboard for your health.

Built for the future, our app is FHIR/HL7-ready and uses machine learning to learn about the user over time.

Patients can share their health record with anyone at the touch of a button.

APP DEMO

Our app stores every aspect of your health.

That includes: test results, immunizations, medications, appointments, genetics, symptoms, and many more.

INFORMATION ARCHITECTURE

Bank-level encryption

HIPAA-compliant API

Epic

Cerner Allscripts

Over 700,000 providers

~80% of U.S. patients

1. User downloads mobile app.

2. Our API imports all patient health data.

3. Patient can view or share their health records.

PILOT PROGRAM

We have closed off our pilot to work with select users across 20 different chronic conditions, some of which include:

- T1D
- Cystic Fibrosis
- Lupus
- Cardiac Failure
- Ulcerative Colitis

Tentative Dates:

- Beta Testing: now - August 15, 2018
- Soft Launch: August 18th

Official Launch Date:

August 31st @ 11:59 CST
